Explore

By the numbers

Before you explore the selection of doorlites and door styles, take a minute to get familiar with some of the language you might come across in this brochure. This will make it easier to choose an entrance system that's just right for you.

- 1 Brickmould**
Decorative moulding used to finish the exterior face of the frame.
- 2 Tempered Glass**
Heat-treated for added safety and strength. Triple glazing sandwiches the decorative glass and helps protect it.
- 3 Caming**
Handcrafted metal that helps decorative glass styles take shape.
- 4 Doorlites**
Glass inserts in various sizes and shapes that add decoration, light, airflow and privacy to your door.
- 5 Sidelites**
Fixed decorative or clear glass assemblies attached adjacent to the door frame to allow more light.
- 6 Hinges**
The plates and pins used to attach the door unit to the frame (not visible).
- 7 Door Frame**
The wood structure that encloses and supports the entire door assembly (not visible).
- 8 Multi-Point Locking System**
Optional upgrade that adds greater security by securing the door to the frame in three places.
- 9 Profile**
The high definition embossment produces deep shadow lines.
- 10 Sill**
The horizontal bottom piece of a door including both threshold and substrate.
- 11 Weatherstrip & Sweep**
The flexible seal surrounding the door panel and bottom sweep designed to reduce air and water infiltration.

Why Choose A Steel Door

Why choose a Steel Door?

Steel doors are a perfect choice for an economical and worthwhile upgrade to your home. Their solid build gives you the strength and security you need. They provide excellent insulation and are weathertight.

The face materials are corrosion resistant to keep them looking beautiful for the life of your door.

Steel doors are the perfect choice when you're looking for a durable and affordable entry system.

Standard Premium Features

- Smooth surface, paintable to match any décor
- High definition embossing
- Finger-jointed wood frames
- Optional vinyl clad frames
- Solid wood lock block
- Premium polyurethane foam core
- Ball bearing hinges
- Compression foam weatherstripping
- Standard Santoprene fixed door bottom sweep

Why Choose A

Fiberglass Door

above:
DRF2K Fir grain exterior fiberglass door

Why choose a Fiberglass Door?

Fiberglass doors are dent resistant, provide excellent insulation and are resistant to heat and cold transfer.

While fiberglass smooth doors can be painted, a fiberglass textured door offers a wood like appearance with four times the strength of a wood door. Plus, they resist splitting, cracking and rot.

With their higher insulation values and durability, fiberglass doors are a smart long-term investment for your home.

Standard Premium Features

- Woodgrain-like textures
- Textured skin may be painted or stained
- Optional smooth surface
- Smooth surface, paintable to match any decor
- High definition embossing
- Finger-jointed wood frames
- Optional vinyl clad frames
- Solid wood lock block
- Premium polyurethane foam core
- Ball bearing hinges
- Compression foam weatherstripping
- Standard Santoprene fixed door bottom sweep

Features

above: Bistro, page 13

Door Frame

A solid door starts with a sturdy frame. Choose between different brickmould sizes to accommodate narrow masonry openings or vinyl clad frames in any of our standard colour options.

Aluminum clad frames are also available when dark colours are required.

Ask your dealer for details

Any frame is able to become an outswing door with the addition of a wide bumper sill which provides a tight seal against water and air.

But we don't stop there. Ask about our upgrade options including:

- Panic and closure blocking
- Deadbolt drilling
- Black compression weatherstripping
- Black sill
- Spring loaded hinges
- Special height
- Sill extenders

Paint

We offer **25** standard colour choices to give your home the right personality.

Please note that colours illustrated may vary due to the printing process.

Contact your dealer to view our official swatches.

Need something different?
No problem, we're happy to match your paint colours.

Options

Custom Sidelites

Fixed sidelite size can be adjusted to match your existing frame opening. Upgrade to a full venting sidelite to let in a gentle breeze.

Custom Sizing

Increase or decrease your door or sidelite width and/or height. Some restrictions apply.

Brickmould Options

$\frac{3}{4}$ ", 1- $\frac{1}{2}$ " or 2" brickmould is available to fit your opening, in a wide variety of colour options to match any décor.

Multiple Door Systems

We can accommodate anything from single, double, triple or quadruple door systems to suit your specific requirements. Height restrictions apply to door systems with transoms.

Transoms

Available in rectangle, extended segmental, elliptical, and half round shapes. We can add a transom over single doors or large entrance systems. We recommend that the frame height of a transom not exceed 36"-38".

Full Venting Sidelites

Get the benefits of a screen door without ruining the aesthetics of your new door system.

Full venting sidelites open to allow fresh air into your entranceway while keeping out the elements.

Venting sidelites are not available with stain grade frames.

Terrace Doors

Enjoy the benefits of a terrace door without having to worry about losing space in the room. Add an outswing door to gain the flexibility you need. Operating like a casement window on one side, outswing venting terrace doors provide full height ventilation and a mounted screen. The other side is a door that provides easy passage, complete with a concealed closer assist that gently and automatically closes the door behind you.

VTD715IG 15 lite, white internal grill (Argon)

- Fantop lites are only available in 5/8"x 1/4" Flat White Grills.

Multi-Point

Lock

Multi-point locking systems provide peace of mind and make our durable door systems even stronger. Factory installed multi-point locks feature a 1" centre deadbolt and latch and two additional anchoring points at the top and bottom. This helps provide greater resistance to forced entry as well as improved weatherstrip compression. All of our multi-point lock systems are made better by allowing easy re-keying if necessary.

Features

- Dummy handle sets can be used on the secondary operator of a Double Door system
- Multi-Point Locking Hardware anchors into the astragal of Double Doors
- 90 degree thumb turn to engage locking points

Benefits

- Provides more security
- Better weathersealing performance
- Helps reduce door warpage
- Easy to use - no lifting of the handle is required to engage locking points

Select a premium Gripset or Lever to compliment your Multi-point Locking System.

Berkeley

Salem

Cortina Levers

Note:

Due to the extended length of 8' doors, a single point lock is not sufficient to maintain a positive weather seal. MDL Door Systems will not supply Steel, Fiberglass Smooth or Fiberglass Textured 8' doors without a multipoint lock.

Ball Bearing Hinges

Smooth gliding ball bearing hinges are the essence of all of our doors. With three finishes available to complement your doorlite selection, we make it easy by automatically supplying you with the right match.

If you have something else in mind, let us know and we will send you the colour you desire.

Zinc hinges will be supplied as standard to all clear glass, internal grills, vents, and mini-blinds.

Standard: Zinc

Optional: Brushed Nickel, Black or Brass

express your style
